Armenian State University of Economics (ASUE)		2016 – 2018
Master's Degree in Management		Yerevan, Armenia
Armenian State University of Economics		2012 – 2016
Bachelor Degree in Management		Yerevan, Armenia

Projects

Curriculum Enhancement and Student Assessment
- Collaborated with the team to improve the existing curriculum by integrating the latest industry developments, ensuring that students received up-to-date and relevant instruction.
- Regularly reviewed students' performance, including final exam results, to identify areas where additional support was needed. This led to a more personalized and effective learning experience.
- Designed and prepared engaging lab projects for a one-month learning phase. These projects were carefully structured to reinforce students' knowledge and practical skills.

BNPL Project
- During my involvement in the BNPL(Buy Now Pay Later) project, I developed UI components and logical algorithms using technologies such as React JS, Node JS, MongoDB, and TypeScript.
- Worked with Rest API's to get the necessary data and migrate it to the database.
- Collaborated closely with business system analysts to gain a thorough understanding of project requirements, and developed appropriate user interface (UI) modules to meet those requirements.
- Wrote 100+ UI/API automation tests of various complexities via Cypress.

A/B Testing
- Developed the UI (using HTML, CSS, React js) of a platform that allows product owners to validate their idea through A/B Testing.
- Worked with analytic tools which were integrated in the project.

Personal Web Pages
- Have been working on personal projects such as landing pages, simple games and other projects in order to develop my skills and expand my knowledge.
